EXPERIENCE

ServiceNow, Inc.

Jul 2022 – Present

▸ Senior Software Engineer Mar 2026 – Present

- Leading development of Now Assist for Smart Assessment Engine — a GenAI-powered feature bringing AI intelligence to the full assessment lifecycle.
- Architected a RAG-based AI suggestion engine using E5-embedding semantic matching, a ranking algorithm, and LLM integration to generate contextual response recommendations for assessors.
- Building a document intelligence pipeline with knowledge-grounded response generation surfacing answers from assessment-linked documents.
- Designed end-to-end backend flow: transaction management, auto-apply logic, REST API layer for AI response creation/retrieval, error handling, and a skill framework deployed across multiple applications.

▸ Software Engineer Mar 2024 – Feb 2026

- Played a key role in the General Availability release of the Smart Assessment Engine (SAE).
- Owned Smart Assessment Collaboration — multi-contributor support with real-time synchronization and live presence indicators for seamless concurrent authoring.
- Architected a low-code Predicate Builder framework integrated with the Post Assessment Actions rule engine enabling automated designer-authored if-then workflows.
- Designed a no-code Condition Builder powering Conditional Visibility, Preferred Answers, Conditional Response Justification, and Conditional Evidence Attachments.

▸ Associate Software Engineer Jul 2022 – Feb 2024

- Built Auto-save for Risk Assessments with scalable REST APIs and a WebSockets-based real-time refresh mechanism across backend and frontend layers.
- Designed and implemented Configurable Risk Assessments with backend-driven UI configurations and a Selenium/WebDriver automation testing strategy.
- Automated user-role hierarchy validation — saved 20+ QA hours per release; built a Right-to-Access licensing simulation tool used by sales and support teams.
- Achieved WCAG 2.0 accessibility compliance across 15+ issues; resolved 50+ customer cases including 15+ high-priority incidents during on-call rotation.

Amazon.com, Inc.

Jan 2022 – Jun 2022

▸ Software Development Engineer Intern

- Productionized the selection safelisting feature in Amazon's internal GraphQL wrapper — designed the low-level module architecture and implemented it end-to-end.
- Implemented unit and integration tests using JUnit and Mockito, achieved 100% test coverage
- Contributed to operational tasks for Amazon GraphQL and Amazon Currency Converter.

ServiceNow, Inc.

Jan 2022 – Jun 2022

▸ Software Development Intern

- Built a feature for managing hierarchical entity relations as a part of the Risk Engineering team.
- Created a web component using the Now-Experience UI framework and D3.js library.
- Implemented a drag-and-drop based graphical interface to create and delete entity dependencies.
- Created REST APIs on the ServiceNow platform to connect the database to the frontend.

EDUCATION

Birla Institute of Technology and Science (BITS), Pilani – Goa Campus CGPA: 8.90 / 10

2017 – 2022

Bachelor of Engineering (B.E.), Computer Science

Master of Science (M.Sc.), Physics

RESEARCH PUBLICATION

Publication: "The Neutron Star Outer Crust Equation of State: A Machine Learning Approach" — Journal of Cosmology and Astroparticle Physics, Jan 2022
